This new release extends the widely acclaimed Markup Import feature, which saves you from having to re-draw a section of the drawing, and the Markup Assist feature, which automatically inserts part into your drawing. Markup Import and Markup Assist gives you the power to update designs with comments and drawings from people. These new features will be delivered as a free update for all AutoCAD subscribers as well as a free update for AutoCAD LT customers. Merge and Solve: Use advanced features to take advantage of associative relationships in your designs and combine parts into a single object. You can quickly solve for parts with the merged objects (video: 1:44 min.) With Merge and Solve, you can quickly combine parts into a single object and then easily solve for those parts. If a part hasn't been moved, it's an easy solution. If a part has moved, your AutoCAD app can detect the new location and help you solve. You can even add a high-tech trail (invisible watermark) to a part. You can use multiple tools simultaneously in this command. Merge and Solve takes place in two steps. You first use Merge to merge individual parts into a single object. Then you can use Solve to solve for the parts associated with that object. AutoCAD LT customers can now use Merge and Solve to combine 2D parts into 1D closed paths. Improvements to the Quick Access Toolbar: Save and Reload: The Quick Access toolbar now includes Save and Reload. To access them, double-click the Zoom tool, which is the first icon on the toolbar.
