Release dates AutoCAD and AutoCAD LT The first version of AutoCAD, known as AutoCAD 1.0, was released in 1983 and included basic 2D drafting tools, and later, 3D drawing. The software was originally sold for only \$2,500, but by 1994, when the next major release, AutoCAD 2.1, was launched, the price had increased to over \$6,000. However, at that time, many companies switched to other software, including CAD and mechanical drafting, as word processors became more popular. AutoCAD's first major redesign

occurred in 1993, when AutoCAD 2.0 was introduced. New features included 3D drafting, image editing, a searchable database of part libraries, and networking capabilities. This version of the software, while still expensive, was considerably cheaper than AutoCAD 1.0. The version 3 release of AutoCAD was also significantly cheaper than 2.0. AutoCAD 3.0 also allowed users to edit DXF files, and added key commands. AutoCAD 3.1 was the first version of AutoCAD to be fully 3D-capable, as it included many new 3D functions such as exploded views, orthographic views, perspective views, and 3D

modeling. 3.5 released in 1994 included several major upgrades, including adjustable line weights, the ability to modify objects after they have been created, and the ability to customize AutoCAD and save customized versions of the software to disk. AutoCAD's next major upgrade was AutoCAD 4.0, which was released in 1996. This was a big upgrade that included the ability to share drawings over a network, added layers to 2D drawings, new tools for creating 2D to 3D conversions, image and vector editing, free-hand drawing tools, a dynamic diagram editor, more editing of DXF and DWG files, and more. AutoCAD was the

first CAD application to be able to automatically track changes made to DWG or DXF files. The next major upgrade was AutoCAD 5.0, released in 1999. The major upgrades were that this was the first version of AutoCAD to include basic 2D and 3D vector drawing tools. This was a popular version that received the prestigious "Product of the Year" award. The major upgrades in AutoCAD 5.1 included the ability to track changes to CAD drawings, the ability to draw on the sides

---

function from another Table? I have two Tables:  
Product\_Suppliers: id | supplier\_id | product\_id  
Product\_Order\_Tracking: id | supplier\_id | item\_id | quantity

At the end of each month, I want to sum the quantity for all items on a supplier's product\_id. How do I do this using MySQL, php and/or SQL?

A: You should be able to use MySQL's GROUP BY to get the desired sum: `SELECT sum(quantity) FROM product_order_tracking GROUP BY supplier_id;` If you need it in PHP you can get the sum with the SQL query with PHP's MySQL extension (if you're running MySQL) or get
