IPAddress=192.168.1.2 I need to get IPAddress value from this string. I used following Regex but it didn't work. Regex r = new Regex(@"IPAddress=*\s*"); A: It's no surprise that this doesn't work: IPAddress=*\s* You need to match either a space or a non-white-space character (i.e. any character except a white-space character) IPAddress=*\s\S* Alternatively, you could make sure there's a whitespace or a non-whitespace character, then make sure it's the last character, like so: IPAddress=*\s\S*\$ A: The problem is that you are using: IPAddress=*\s* You need to match any character other than a space: IPAddress=*\s\S* This will match all: A space A non-space character An uppercase character A lowercase character A punctuation character A character with a value equal to '1' (this will only match the first occurrence of 1) A newline character () A tab character (\t) A carriage return (\r) A backspace character (\b) You can use a 'dot' for multi-character lookaheads: IPAddress=\s*[a-zA-Z]\.(?:[a-zA-Z

Features Key:

Advanced Graphics & Visuals

Elden Ring is a new type of fantasy RPG in which graphics are the centerpiece, with Western-style art and fluid battle scenes.

3D Profiles and Searchable Character Database The 3D profiles and characters appear more realistically, as do the NPCs in combat scenes. Moreover, a search function allows you to look up the skills of any character you choose, even in other areas of the same server.

Combat is Realistic & Fast-paced A real-time battle system that allows you to play your character's movements more freely. Design your strategy and benefit from the alternating of turn order. In the offensive mode, you can choose your attack position for more effective strikes.

Performed Action A procedural animation system that causes your character to leap forward every time you start a move. It is based on the technology used for the graphics.

Mobile Focus A unique user interface has been developed for smartphones which expands the locations and opportunities for battles in the vast world on the go.

Elden Ring is currently available for free on the App Store. If you have been missing Elden Ring, keep a close eye on our new page by the game's developer, Omacsoft, and welcome the developer's Twitter account, @elden_ring.
