Checkout Noosphere is a card game combining cards with a unique AI system. It's a fun and challenging game, with a lot of tactical depth, and a fun energy based gameplay. You're alone against a challenging AI, this is no cake walk. Checkout Noosphere is designed to challenge your brain and test the limits of your strategic mindset. You'll have to think in a more strategic, planned and less random way, than you are used to. The game is a game of counter-attack, where you have to use your strategy against the AI in order to counter their quick and lethal counter-attack first. The order and timing of the cards is crucial to win and remain alive. How to Play: The "Human" player starts the game with an empty hand. It's up to him to choose a layout, and an order in which to play his cards to set up his strategy and work on his hand. Move the 2 + 3 + 4 to the next space, slowly and cautiously, allowing the other player to attack and at the same time trying to anticipate and counter his move. Checkout Noosphere is a game of invention and clever solutions to the problem at hand. Each player has a hand of cards and at any given time there are a maximum of five cards in play. The player that completes his hand, by adding up all his card values or drawing a card into his hand, is the winner. Game Development: Checkout Noosphere is made in Unity3D, with some custom art and textures and made in only two months. The game is a mix of a card game, a puzzle game and a strategy game. A complex AI has been used, to make the game interesting and challenging. The AI plays very differently from a person, its movements, deck of cards and the game is very difficult for a beginner or casual player. The game has a few unique features. The AI and player's cards are drawn from a deck of random generated cards, meaning that the game can never be played exactly the same twice, even if you use the same deck. There is a random deck generator that you can plug in to the game, which changes the distribution of cards in the AI's deck. There is a hidden deck of cards that can be used in the AI's moves in specific situations, which allows for some

Enjoy playing game Tiger Tank 59? A-Gun MP086.

Tiger Tank 59? A-Gun MP086 from mir-soft website might be available for you to download in December a couple of time with full version. This game distributed with java virtual machine and android operating system and you don't need any special configuration to install this game on your computer and phone. You will not have any option to play online or find multiplayer, you can play the game by yourself even there's no servers to play the game. So guys if you like the game, think to buy it just to play it online but don't forget to download e free crack APK version of the game.

i like it, though the graphics suck... im using a Nokia Lumia 800 with 720P HD screen, but my handsets screen are only 480X800 and text and graphics look bad so i bought this game to use it on my desktop screen to stay concentrated and enjoy the game.. my dkesktop screen is 1920X1080, this game has awesome graphics though, i just hope i can get online for multiplayer mode. My tegra 3 is the supported GPU in the game release notes. It is a high-end Android device released a year later. Would it be possible to see more information about the Tegra 4 device provided in the game to see if the game can run properly or not? I have followed the released guide on the developer website previously. This application won't run properly if the Tegra 3 is used. Thank you for your reply. How could we get the Android version to work? Downloading
