What's new:

, Relics of Existence Share this: You'll be forgiven for immediately assuming that Kerbal Space Program is about human astronauts blasting off to explore the final frontier, because you get that impression pretty immediately. It's one of the clearest videogames in recent memory, for those who remember 1999 in the same way that we remember the past decade. The sensation of self-sustaining flights in lopsided rockets launches are the core of the experience; attempting realistic, do-or-die research instead of paper airplanes, but still delivering the to-space spectaculars. Green shade on the preview screen, then white, then earth as you climb away from the atmosphere, and the fun increases exponentially. Somewhere around halfway through the game of cat and mouse with the ground, you learn that, no, you aren't actually going to space. The goal of the game is quite different from most flight-focused games, it has a non-linear approach to reality: it is, as I wrote in my review of it, a game where you play God. There's a line of games about playing God, from Crusader Kings, through Spore, to Fahrenheit 421. In those games, you're given a blank canvas, and are expected to control the world, by which I mean every galaxy, everything that happens. As you change the rules, you reward yourself with discoveries and edges of the world that weren't possible before. In Green, you start with the goal to establish you're a space agency above the great firestorm that is Earth and many moons, after that achievement, the goal is to reignite green light to the dark sector surrounding you. The Green Mode doesn't feel like a videogame; it's like a mod to a mod: an artificial facet for the game that exercises the underlying engine in new and interesting ways. Instead of piloting a ship from the dashboard, you're navigating thousands of light years of space, following paths to terminals that give you blue, green, or red light. It's a beautiful game, a wonderful art form, but that beauty is tarnished by the hidden nature of the content. It's also a playfully subversive game. While Kerbal Space Program is a nice blend of a first-person shooter and open space flight sim, this content you're discovering is one that's automatically saved in the

- Yaya, Aiyana, and Koko were childhood friends. They were born in the same small village, and they spent their days together peacefully. That all changed, however, when a group of strange monsters attacked their village, and Koko went missing. - Three years later, Yaya and Aiyana embark upon a journey to find Koko. During their travels, they're able to persuade the devious witch Maia to help them, and she uses her magical powers to find Koko's location. - With Maia in tow, Yaya and Aiyana travel to a village presided over by the kind-hearted princess, Arie. Arie is experiencing something of a dilemma herself, as her village has been ailing from the ill effects of a protracted drought. The rivers which run near her village have turned bone dry, the crops dead, and her people are struggling to make ends meet. - Arie agrees to help Yaya and Aiyana search for Koko, but only if Maia will agree to use her magical powers to right the drought which has ruined her village. - While Maia prepares for this ceremony, Yaya grows close to Arie. Feelings between them begin to develop - but if Yaya is to stay by Arie's side, she'll have to abandon her quest to find Koko. - Then, there's Arie's high priestess to worry about, whose behavior is awfully suspicious. About the game: Yaya is a cheerful, energetic young woman who always looks on the bright side of life. She's very protective of her childhood friend, Aiyana, and she dedicates herself to cheering Aiyana up. Aiyana is an anxious, awkward girl born into a family of shamans. Though those with white hair are believed to possess immense magical powers, Aiyana is quite mundane, and has no special abilities to speak of. That did not stop her from being bullied and mistrusted while growing up, however. Aiyana is a delicate young woman with little in the way of stamina. She feels faint at the sight of blood, and can't stand the thought of hunting. She often relies on Yaya to fight her battles, which leads to her feeling like a dead weight, despite Yaya's constant reassurances. Maia is a mischievous witch whose age is something
