The success of the first game was proof enough that the two-dimensional platformer style, instantly recognizable by its distinct 90's soundtrack and happy/death mashup of gameplay types was a genre that people were still obsessed with, but as far as most traditional Mega Man and Defender of the Crown fans were concerned, that was their cue to move on. With Dunos II, however, that all changes; while still staying true to the game's strong reputation for its gameplay - and due to its new focus on the sideways scrolly style - the game feels like a throwback to the games of yesteryear, while still maintaining the core aspects that made it so loved and well received in the first place. "with its accessible play-ability and cheerful cartoony visuals it can be a lot of fun if you are looking to forget your troubles for a bit." 9.5/10 - Game Over Online "It's just a blast to play, and the difficulty feels perfect. The maps that go beyond levels are both a blast to see and a blast to play
