YouTube channel: Twitter: Facebook: Monday, March 14, 2016 We'll Make A Sound! Smash Hit Quiz TV Series Head of Sound Design Danny Portas with Chris Weatherhead Danny Portas first fell for music from TV at a young age. Although an avid musician in his spare time, he had never considered a career in television or radio before. On a whim, he decided to try out for a position at a local FM radio station. Danny got the job, moved to Portsmouth and worked at a radio station. Over the next few years Danny not only developed his reputation as a talented and creative sound designer, but also as a leading figure in the community. He helped to bring other local new media innovators together to tackle the everyday issues facing the city. He left the radio and concentrated on a new chapter in his life. Investing his wealth in small recording studios, mic casings and other audio equipment, Danny set up his own sound studio. Simultaneously, he taught himself how to make games and began teaching others how to make them too. Through all this, Danny got to know Billy Ashcroft from the local gaming group and the two hit it off. Danny joined the group and they began to build together. As a seasoned radio professional, Danny was a sound designer in chief for City Slam. He then set up ShadowPlay Studios and the two became full partners. Ever Wondered What Sound Effects and Special Effects Audio Could Do For your Game? Danny and Chris talk about: How games are changing, and what the future holds for how audio is designed for games, how gamers interact with games in changing. What technology gamers have at their disposal now, and how that's changing how we interact with sound in games
